### Portfolio Manager Commentary

The annual effective yield settled at 10.39% as at June 2023 as the fund manager continued to reprice maturities and inflows into higher yielding shorter duration instruments.

Kenya's year on year inflation continues to breach the Central Bank's upper limit despite it easing by 0.1% to 7.9% in June from the previous month. The easing was mainly driven by base effects.

The Treasury Bill yields edged upwards by an average of 0.73% across all tenors. Yields are likely to cross the 12% mark. The 91, 182 and 364-day Treasury bills closed at 11.78%, 11.86% and 11.93% respectively.

Outlook: We expect yields to remain elevated reflecting higher inflation

and stricter monetary policy. Recent increases in electricity prices and new taxes effective from 1st July, such as doubling of value-added tax on petroleum to 16% are likely to keep inflation above the upper CBK limit of 7.5%.

### DURATION PERFOMANCE

Fixed Deposits, 99.9%

The fund manager invested in near cash instruments particularly high yielding deposits.

The chart reflects the growth of a KES 100,000 investment at the start of the year with 100% reinvestment of distributions.
